

# Is the Museum to die for?

January 1, 2017

## We're in the Book!

While the full title is *1,000 Places to See in the United States and Canada Before You Die*, this third edition includes Los Alamos and highlights the Museum including a color photograph of an exhibit here.

The entry also includes information on the Valles Caldera and Bandelier National Monument; however, the Museum is clearly its focus with three of the six paragraphs devoted to the Museum, the Lab, and the Manhattan Project. The entry is called "Birthplace of the Atomic Age," after all.

The Museum is included in the "Four Corners and Southwest" section in the "New Mexico" listing.

Within Amazon, this latest paperback edition is listed at the "#12 most popular title" in "Tourist Destinations & Museums Guides" (as of this writing).

It's also the 39th most popular book in within the "Food, Lodging & Transportation" category for the paperback.

The previous edition was released in 2011.

1350 Central Avenue  
Los Alamos, NM 87545
